# GENERAC MOBILE AFTERMARKET PROGRAMS

# MAINTENANCE

## EQUIPMENT MAINTENANCE

Save time and money with Generac Mobile maintenance kits. Kits are ready to ship for fast and convenient ordering and delivery

**Maintenance Kits:** Generac Mobile maintenance kits include warranty-compliant fuel, air and oil filters needed for routine maintenance of your equipment.

**Belt and Hose Kits:** Wear parts like belts and hoses should be replaced annually, or as part of a standard maintenance interval. Our convenient kits include all of the parts and hardware to get your equipment ready as part of pre-season preparation.

**Bulk Fluids:** Bulk quantities available of oil, coolant, heat transfer fluid (HTF) and diesel exhaust fluid (DEF).

### Bulk Batteries

## AUTOMATE YOUR SERVICE NEEDS WITH AUTO-SHIP

Generac Mobile's Auto-shipping Program allows you to order bulk quantities of service parts and maintenance kits for delivery on a pre-defined schedule. This program is best suited for customers with maintenance contracts and very large consistent fleets, such as entertainment divisions and state/federal contracts.

# SERVICES

Rely on Generac Mobile for all of your mobile equipment needs. From innovative mobile generators, light towers, pumps, heaters and water solutions to maintenance and repair of your equipment to keep your fleet optimized and efficient.

## Load Banking

When a generator is lightly loaded for an extended period, a condition known as wet stacking can occur within the engine and after treatment system. The result is a reduction of load acceptance and total power output. To recover a diesel engine from a wet-stacked condition, it must undergo increasing levels of load up to the full rated output until the symptom resides. Our field support team is equipped with industrial load banks and can dispatch to your location to service fleets of all sizes.

## Engine Diagnostics

Today's technologically advanced equipment may require specialized tools and technicians that can interpret, resolve, and clear alarm codes and faults. The costs of diagnostic equipment and labor can be quite high. Generac Mobile's team of qualified field service technicians can dispatch to locations and provide on-site diagnostics, reducing travel and shipping costs along with reducing the total amount of down time.

## Service Regeneration

Interim and Final Tier 4 diesel generators with a DPF after treatment have the capability to passively and actively regenerate the system to reduce soot and ash levels. However, all too often customers find themselves beyond the point of no return resulting in service regeneration; required to remove a 50% de-rated condition. While taking the unit to an engine service dealer is an option, Generac Mobile technicians can dispatch to locations and provide on-site assistance.

### Delivery Inspection

All Generac Mobile equipment is factory tested prior to delivery to the customer. However, there are still activities required on-site to get the equipment jobsite ready. This includes assessing the equipment condition for shipping damage, filling and verifying fluid levels, deploying the tow hitch, performing initial startup and green-tagging the equipment for rental. Trust our factory-trained technicians to provide on-site inspection, providing you with an additional level of confidence and peace of mind before deploying equipment to the jobsite.

### Equipment Refurbishment

As equipment in your fleet ages, it becomes less efficient and may stop working altogether. Maximize your investment by having Generac Mobile technical service experts review your current equipment, recommend repairs and upgrades and conduct factory-certified refurbishment to extend the service life of your equipment.

For certain equipment, refurbishment can greatly reduce expenses by extending the life of your existing fleet, including:

**Mobile Heaters** – Extend the life of your Generac Mobile flameless, indirect and hydronic heaters with inspection and refurbishment.

### Service Contracts

No matter the size or location of your mobile equipment, Generac Mobile can work with our servicing dealer network to identify a custom solution that will fit your unique needs.

### Downline Support

Fleet managers can see large influxes of down equipment during peak rental seasons. Instead of leaving assets frozen on the deadline, our team of factory trained support representatives can work with customers from the jobsite to the corporate office to get your fleet back up and running.

## TRAINING

**Training Level 1:** Generac Mobile offers field based level 1 technician training at the customer's location. This training level is required for any level of servicing dealer. Time, date, and location are coordinated between the customer and a factory representative.

**Training Level 2:** While level 1 training is often comprehensive enough for most rental dealers, full service dealers may want a more comprehensive dedicated training course. The level 2 training is three-day factory course held at the Generac Training Center in Eagle, WI. Courses are scheduled throughout the year.

# ACCESSORIES

## PRODUCT ACCESSORIES

Enhance your Generac Mobile equipment with manufacturer-certified accessories.

**Accessory Kits:** Generac Mobile offers a variety of accessory kits, including diffused lighting kits for light towers, controller upgrade packages, cold weather kits and more.

**Electrical Distribution:** Includes insulated cables and wires 2/0 – 4/0 for generators with lug or cam-lock connectors, distribution panels including spider-boxes, i-line panels and more.

**Pump Accessories:** Includes pump hoses, couplers, fittings and more.

**Heater Accessories:** Includes heat ducting, hydronic hoses, fittings and more.

**Spare Parts:** Know what critical components are needed to service and maintain your Generac Mobile equipment. We can customize a recommended spare parts package for you based on the size and composition of your fleet.

## TOTAL SUPPORT

Generac Mobile is committed to supporting our customers before, during and after the sale. Our customer and technical support staff are only a phone call or e-mail away. We inventory competitively priced service parts and maintenance items so they are available when you need them, because downtime is lost time. And Generac Mobile's world-class technical support team is available 24/7/365 should you need assistance.

**Generac Mobile's mission is to develop mobile equipment and solutions that provide an unmatched value and customer experience for a safer, brighter, more productive world.**
